

INTERNATIONAL QEEG CERTIFICATION BOARD

Become an IQCB Certified Professional

Earn a credential trusted by employers and peers worldwide. The IQCB certification program validates your expertise, strengthens your career, and connects you to a global community of certified professionals.

WHY GET CERTIFIED

Invest in a Credential That Counts

IQCB certification is built on rigorous, industry-informed standards — so the credential means something the moment it's earned.

Global Recognition

A credential respected by employers and regulators across industries and borders.

Career Advancement

Certified professionals report faster promotions and stronger earning potential.

Verified Expertise

Rigorous, standards-based exams ensure every credential reflects real competence.

Global Community

Join a growing network of certified professionals, mentors, and industry leaders.

THREE CERTIFICATION TIERS

DIPLOMATE-LICENSED

QEEG-DL

for licensed healthcare professionals practicing independently with QEEG.

DIPLOMATE

QEEG-D

for candidates holding a Master's degree or higher in an approved healthcare field.

TECHNOLOGIST

QEEG-T

for candidates without a Master's degree, working under a certified Diplomat's supervision.

HOW IT WORKS

Your Path to Certification

Steps from application to credential — candidates have 3 years to complete the process

1

Create your IQCB accounts and submit your application

Create an account on **Certemy** — the platform IQCB uses to manage applications, track requirements, and process exam eligibility. This is where you will submit your application and documentation. Create your **IQCB** website account to access candidate content.

2

Complete approved didactic training

Attend an approved didactic qEEG course from an IQCB-approved provider. The course must cover all competency domains in the Blueprint of Knowledge.

3

Gain supervised clinical experience

A minimum of one year of supervised clinical practice is strongly recommended before sitting for the examination. The exam is designed to assess the interpretive fluency that comes only from working with real patient data under qualified supervision — not classroom knowledge alone.

4

Complete mentorship requirements

Complete a minimum of ten contact hours with a qualified IQCB Diplomate. Mentorship must include review of at least ten patient data analyses and five formal QEEG report presentations. Two of these hours must involve direct observation of your work. You may use more than one mentor. Long-distance mentoring via phone or video.

5

Pass the exam

Schedule your examination at your convenience — the exam is available online, proctored, 24 hours a day, seven days a week. A Study Guide is available through the IQCB website. The passing score is 70%.
